

This special accessory has been conceived to add a 3rd axis to a standard Fluid Head and allow the lateral movement called "Dutch angle", enhancing special effects.

Available in **C20S** and **C40S** size the **CARTONI DUTCH HEAD** is designed to make exceptionally smooth side-tilt effects simple and straightforward to execute.

The **DUTCH HEADS** integrate the award-winning **CARTONI** fluid module in progression from "0" to 7 intensity. The counterbalance system features the 7 step spring mechanism.

In both versions **CARTONI DUTCH HEADS** interface directly with the quick release plate on the top of the main Fluid Head, and with the same size camera plate to attach the camera assembly.

A special telescopic pan bar completes the equipment.
